

SafetyDave

Fire safety, first aid & rear vision systems

1 Channel to 2 Camera Switch Box

The 1 Channel to 2 Camera Switch Box allows you to connect two cameras per channel on your Safety Dave 2-Channel Monitor. This provides added flexibility and convenience for a variety of vehicle setups.

How It Works

- The Switch Box enables you to connect two primary cameras and two secondary cameras to a Safety Dave 2-Channel Monitor.
- The secondary cameras will only activate when the primary cameras are disconnected from the system.
- It's a perfect solution for a car and caravan setup.
- If a caravan has two primary cameras, using two Switch Boxes allows for the installation of two secondary cameras on the vehicle.

Why You Need It

- Adds a reversing camera to vehicles that do not have one installed.
- Provides rear vision for vehicles with canopies or fully loaded rear compartments.
- Adds an additional reversing camera to a vehicle to allow for easy hitching to caravans, especially if existing reversing cameras are not centred on the vehicle.
