Fire safety, first aid & rear vision systems

Safety Dave – Wireless Rear Vision Transmitter & Receiver Guide

You can add a **Safety Dave wireless camera** or **wireless monitor** to your existing wired system using a receiver or transmitter.

Adding a Wireless Camera to a Wired Monitor

If you have a **wired Safety Dave monitor**, you can add a **Safety Dave wireless camera** using a **Safety Dave Receiver**.

- Plug the receiver into the power loom under the dashboard in your vehicle.
- Press and hold the Pair button for 3 seconds to connect the camera to the monitor.

Adding a Wireless Monitor to a Wired Camera

If you have a **wired Safety Dave camera**, you can add a **Safety Dave wireless monitor** using a **Safety Dave Transmitter**.

- Plug the transmitter into the 4-pin female cable at the front of the van.
- Connect the transmitter wires to 12-volt power and earth.
- Press and hold the Pair button for 3 seconds to pair the monitor and camera.

Note: Magnets (sold separately) may be used to attach the transmitter to the A-frame
